## Summary

AI/ML Software Engineer specializing in production-grade LLM systems, with hands-on experience in **retrieval-augmented generation**, **multi-agent orchestration**, and **parameter-efficient fine-tuning**. Skilled in designing, evaluating, and deploying enterprise AI platforms. Passionate about building reliable, observable AI systems that bridge the gap between research and production.

## Technical Skills

| | |
|---|---|
| **Languages** | Python, SQL, C++ |
| **Frameworks & Libraries** | LangChain, LangGraph, FastAPI, Flask, PyTorch, Hugging Face Transformers, PEFT/TRL, Scikit-learn, OpenCV, YOLOv3 |
| **Tools, Platforms & Databases** | Git, GitHub, Google SDK, Qdrant, ChromaDB, Supabase, Docker, Amazon Bedrock, AWS, Langfuse |
| **Soft Skills** | Problem-Solving, Agile, Leadership, Teamwork, Research & Analysis |

## Experience

**Maxnet Technologies LLC** — Pune, Maharashtra
*Junior AI Engineer* — *Mar 2025 – Sep 2025*

- Designed and shipped a **queue-based RPA orchestration engine** (**Python + UiPath CLI**), reliably running **20+ scheduled automations** without conflicts and cutting manual scheduling effort by ∼**90%**.
- Built a **LangChain**-powered conversational control layer with a **Flask REST API**, letting operators reschedule and query automations in natural language.

**MyEquation** — Remote
*Technical Content Curator* — *Mar 2025 – Jun 2025*

- Researched applications of **AI and machine learning** in robotics, and documented practical use cases and concepts in clear technical content.
- Earned recognition from the company's **COO** for research quality and for identifying novel applications of AI in the industry.

## Projects

**Nexus: AI Data Analyst & Reporting Platform**

- Built a configurable **multi-agent hub** with an **NLQ-to-SQL** engine that automates core data-analyst work by translating natural-language business questions into validated T-SQL through a **DAG-based workflow engine** (17+ node types) with tool-mediated agent delegation, jailbreak detection, and role-based access guardrails.
- Created a **generative reporting pipeline** that turns query results into live **dashboards**, **infographics**, and scheduled **PPTX/PDF reports**, removing the need for manual report-building.

**OmniMind: Multi-Source Intelligence Assistant**

- Built a **hybrid retrieval** pipeline (dense vector search + BM25, merged via **Reciprocal Rank Fusion**) with **cross-encoder reranking**, instrumented with production observability and a **CI-gated evaluation pipeline** (60+ automated tests).

**SpiWave: Real-Time Voice AI Assistant**

- Architected a real-time **voice AI orchestration engine** that classifies intent for every user turn and dynamically routes it through **RAG**, tool calls, or a direct answer, while holding sub-second audio latency and tracking per-stage latency percentiles (p50/p95/p99) and cost for observability.

## Education

**Savitribai Phule Pune University** — Pune, India
*Bachelor of Computer Engineering; CGPA: 8.21* — *2023 – 2026*

**D.Y. Patil College of Engineering** — Pune, India
*Diploma of Computer Engineering; 82.51%* — *2020 – 2023*

## Certifications

- Machine Learning Specialization – DeepLearning.AI & Stanford University (Coursera)
- Generative AI to AI Agent Masterclass for Software Engineers (Udemy)
- AWS with Python – Symbiosis Skills and Professional University
- IBM SkillsBuild – AI, Cloud Computing & Project Management Fundamentals
